**HuskieToolFacts**

### Specifications

Output	60 Ton
Weight	43.5 lbs. (Steel) 34 lbs. (Titanium)
Size	6"W x 17"H
Cable Capacity	2.4" O.D.
Die Style	HA60-Series
Ram Stroke	1.5" Travel
Oil Volume	312 cc

### Connector Range

Lugs	Up to 2000 MCM Cu/Al
Splices	Up to 2500 MCM Cu/Al

### Order Data

EP-60WB	60 Ton Single Acting Compression Head
EP-60WT	Titanium Model

### Features

- Removable Base
- Oblong lifting ring
- Removable Die Cap for Easy Cable Insertion
- Designed for ACSR & ACAR Transmission and Distribution Cable
- Lightest 60 Ton Presses in the Industry
- Ultra Light Titanium Model Available
- Extremely Portable

The **EP-60WA** is the lightest single acting 60 ton press in the industry that is designed to compress sleeves and lugs on ACSR and ACAR transmission and distribution cables. They are also ideal for substation construction and are operable from any 10,000 psi pumping source with proper oil capacity. These tools are made to be portable for easy maneuverability, unlike other brands. The EP-60WB can be operated, utilizing the oblong lifting ring with use of a lifting rig. The EP-60WA series will readily accept any shell type dies currently used with Alcoa or Burndy 60 ton presses. Dies not listed can be made to specification; consult Huskie for more information.

The EP-60WA series is also offered in titanium. Titanium has the strength of steel but weighs nearly 30 percent less. Due to its lighter weight and the tool's portable design, the chance of back and muscle strain is greatly reduced. The titanium 60 ton press is easily maneuvered where heavy steel presses are almost impossible to operate, making it an ideal tool for jobs such as helicopter line installations.

**NOTE:** When using any of these high-pressure tools, always use 10,000 psi rated non-conductive hose (NC-16 series).
